

## About My Custom Website Design Fees...

My fees are \$75 per hour for businesses, \$60 for nonprofits. I charge on a per-hour basis because I want my clients to get the most bang for their buck.

It takes me a few hours to create a visual concept for your consideration. These ideas are just a discovery process. Once the site has a look and feel you're happy with, I develop a custom template so that individual pages (links) may be updated easily. Along the way, we may add a slideshow, video, music, shopping cart or other enhancements. This takes me another 5-25+ hours, depending upon the number of links and complexity.

---

Below is a broad cost estimate:

Number of Web Pages	Web Design Estimate
3 pages	\$550
4 pages	\$700
5 pages	\$850
6 pages	\$1000
7 - 8 pages	\$1,300
9 + pages	\$1,500 and Up

---

Flexibility is an integral part of my designs. My services include: Page formatting, scanning of artwork or photographs to create computer-friendly artwork. I use HTML standard with Cascading Style Sheets (CSS) for my web development. I also do WordPress sites (please see separate WordPress rates.)

### **"But All I Want Is One Page"**

If you're looking for nothing more than a business-card site, I do offer a "starter" package consisting of a single web page with limited text, graphics and photos.

**Here's the package:** Site hosting and registration advice and a design that includes: contact person, business name, address, phone and fax number, e-mail address link, up to three graphic images plus limited text. Cost: \$350. Additional pages and graphics may be added to the Starter Package at any time, billed at my standard hourly rate.
